

IMPACT REPORT

2021 / 2022

Seattle-King
County
Dental
Foundation

1111 Harvard Ave
Seattle, WA 98122

About the Foundation

The Seattle-King County Dental Foundation is dedicated to proactively eliminating dental infection and pain in the King County population that lacks resources and/or access to dental care. We do this by:

- Advocating and facilitating access for the underserved;
 - Increasing awareness of and resources for new and existing programs;
 - Partnering with other that can help; and,
 - Demonstrating responsible use of our resources to our donors
-

We concentrate our giving within King County and fund programs or projects that:

- Aid the economically disadvantaged or underserved;
- Eliminate dental infection and pain with particular focus on uninsured or underinsured individuals; and,
- provide treatment for "day of" dental emergencies

Within these areas, we prefer programs or projects that meet the following criteria:

- Affect significant numbers of people;
- Empower people to improve their oral health;
- Encourage cooperation among organizations and institutions

President's Report

The Foundation Board has been working behind the scenes for the betterment of our community for the past few years. We were able to realize our dream community goal of promoting dental health through our partnership with MTI by both providing teams of dental professionals and new branding of the dental health vans.

While the pandemic brought its own constraints, this gave the Foundation a terrific time to evaluate its past achievements and determine how to best move forward to create an exciting new future that our dental profession could rally around. We challenged the SKCDS 'Access to Care' committee to create programs for the future with short term sustainable goals and some even loftier long-term goals.

Your Foundation Board has always remembered the underlying goal of the Society to provide an avenue to improve our community's dental health and well-being while being financially sound with our donors' generous support.

We look forward to better times and thank you all for your dedication.

A handwritten signature in black ink that reads "Dr. Nina Sino". The signature is fluid and cursive, with the first letters of "Dr.", "Nina", and "Sino" being capitalized and prominent.

Foundation Board President

Medical Teams International

The Foundation and Medical Teams International entered into a five-year partnership in January 2020, through which the Foundation sponsors fifteen dental vans per calendar year, six of which are staffed directly by members of the Seattle-King County Dental Society.

Jubilee REACH - April 24, 2021

- 24 adults treated
- 10 referrals
- 45 dental procedures completed
- Total Procedure Value: \$10,462

136 total
adults
treated

3 total
children
treated

Renton New Life Church - July 17-18, 2021

- 43 adults treated
- 11 referrals
- 245 dental procedures completed
- Total Procedure Value: \$25,060

Riverton Park United Methodist - October 2, 2021

- 14 adults treated
- 2 children treated
- 6 referrals
- 104 dental procedures completed
- Total Procedure Value: \$10,985

40
referrals
made

Medical Teams International

Casa Latina - December 4, 2021

- 22 adults treated
- 3 referrals
- 108 dental procedures completed

procedure
value

Upcoming Clinics

- South King County Health Fair - September 24, 2022
- Riverton Park United Methodist - October 29, 2022

Swedish Foundation

In 2021, the Swedish Foundation applied for a grant from the Seattle-King County Dental Foundation for the final amount needed to purchase a new Sirona Cone Beam CT for the Swedish Community Specialty Clinic.

The new CBCT was installed on July 11, 2022 and has already had profound impacts on the quality of care delivered to patients. This new machine allows the doctors and staff to take real time, high-quality three dimensional imaging in order to rapidly facilitate surgical planning and diagnosis of pathology. With the three-dimensional imaging, the providers at the Clinic can obtain a precise view of the patient's hard tissue structure to allow for surgeries to occur more quickly and safely.

Prior to the installation of this unit, the patients were required to obtain three-dimensional imaging from the medical radiology unit at Swedish First Hill. This process was lengthy and tedious for these patients and significantly disrupted their access to care.

KidsQuest Children's Museum

The Foundation provided a grant to the KidsQuest Children's Museum to celebrate National Children's Dental Health Month in February 2022. This grant made dental themed programming possible all month long to promote the importance of oral health to all museum visitors.

28 Dental Themed Museum Programs

- 110 people attended Engineering Hour Programs
- 165 people attended StoryTime Programs
- 133 people attended Play with Paint Programs
- 197 people attended Play with Clay Programs
- 231 people attended Weekend Playshop Programs
- 64 people attended Science Hour Programs
- 66 children received free oral exams

Priority Populations Reached

- 892 'Museums for All' Visitors
- 33 low sensory visitors

Community Oral Health Advocate Program

The Community Oral Health Advocate Program (COHA) by the Office of Educational Partnerships and Diversity in the University of Washington School of Dentistry intends to develop and implement curriculum to reduce oral health disparities by assisting individuals with lack of access to professional dental care to find dental home and improve their oral health literacy and oral health self-efficacy. Another goal of the program is to train students from underrepresented minority communities to be the COHA's in their own communities with the goal of supporting their pathways to the health professions.

Unfortunately, the program start date was delayed due to pandemic complications, but the curriculum has been under development and a website prototype has been created. The program administrators will be hiring Master's level dental hygienists for program coordination and have already had meetings with the Office of Superintendent of Public Instruction Migrant Educations Programs to engage high school counselors and administrators.

COHA scholar selection will begin in November 2022, with online and in-person training starting this same month. Clinical internships with patients will run from April 2023 to September 2023.

SKCDS Sealant Program

For the initial launch of this program, the Highline School District was approached to gauge interest in a program to apply sealants to six-year molars and provide dental education in the classroom.

The program launched at Midway Elementary with a focus on the second grade class (107 enrolled) on May 20, 2022. The second, and final, treatment day for this school year took place on June 8, 2022. Discussions have already begun with principals at other elementary schools in the district who are excited to welcome this program to their own campuses during the next school year.

May 20, 2022

- 7 children screened
- 5 received fluoride varnish
- 15 sealants placed

June 8, 2022

- 6 children screened
- 5 received fluoride varnish
- 12 sealants placed

Planned Schools for 2022-2023

- Midway Elementary - 92 second graders enrolled
- McMicken Elementary - 85 second graders enrolled
- Cedarhurst Elementary - 67 second graders enrolled
- Hilltop Elementary - 78 second graders enrolled
- Mount View Elementary - 71 second graders enrolled
- Bow Lake Elementary - 77 second graders enrolled

Thank You Donors

Thank you to our incredible donors! Your support allows the Foundation to not only ensure constant improvements to access to care throughout King County but also creates vital community partnerships for the dental field. These programs strive to break down barriers, both real and perceived, in an attempt to ensure a healthy future for all.
